

Tiger Racing

Formula SAE ⚡ Electric

SPONSORSHIP PACKET 2026-2027 EDITION

Proven Combustion. Electric Ambition.

What is Formula SAE?

Formula SAE (FSAE) is an international engineering design competition in which university students **design, build, and race** a formula-style car entirely from scratch. Competing against teams from around the world, students are challenged to apply their knowledge in real-world scenarios, combining advanced engineering principles with hands-on fabrication, testing, and validation.

The competition evaluates teams not just on vehicle performance, but also on engineering design, cost-effectiveness, and marketing presentations, **mirroring the multifaceted challenges of the automotive and technology industries**. FSAE serves as a powerful educational platform that equips students with the technical expertise, teamwork, and leadership skills required in today's competitive workforce.

About TigerRacing

Our Mission

TigerRacing is LSU's premier student-led engineering team, operating as a **high-performance startup**. We bridge the gap between classroom theory and industry application, tasking members with everything from high-voltage systems integration to corporate fundraising.

Our Competitive Edge

Our team is defined by a bold transition from a **top-performing internal combustion team to a fully electric platform**. Since 2023, we've channeled decades of championship-level IC expertise now fuel our EV development, and in this past season, that foundation paid off. We placed **31st/118th, climbing 48 places in a single year** and proving ourselves as a legitimate challenger on the international stage.

TigerRacing Milestones (IC)

1983

TigerRacing begins as a **senior design project**. Seven mechanical engineering students at LSU develop the university's first formula-style vehicle, laying the foundation for a legacy of hands-on innovation.

2013

After years of sporadic involvement, TigerRacing formalizes into an **official university organization**. The team commits to the annual FSAE Internal Combustion (IC) circuit, establishing a consistent presence in international competition.

2022

TigerRacing achieves its best season in the IC category to date. Through meticulous engineering and driver skill, the team secures **7th place overall** out of 89 teams at competition, highlighted by a dominant **2nd place** finish in the Skidpad event.

2023

Aligning with the future of automotive technology, TigerRacing begins its **transition from IC to Electric Vehicle (EV) development**. This shift challenges our engineers to master high-voltage systems and sustainable racing technology.

TigerRacing Milestones (EV)

2025

TigerRacing fields its first all-electric vehicle, taking on an entirely new high-voltage discipline. The debut season ends in a tough result but yields something greater: **a clear, hard-won blueprint for building a competitive EV program.**

2026

TigerRacing **passes EV technical inspection** for the first time and finishes 31st of 118, scoring in every dynamic event. In just one season, our team has transformed from a newcomer into a **proven competitor.**

2027

The Strongest Team Yet

Entering 2027 with the **most technically capable roster in program history**, TigerRacing is building on a working, race-proven electric car, setting our sights on a Top 20 overall finish.

Top 20 isn't a bold claim for marketing sake, it's just the next step. The numbers tell the story.

31st/118

Best EV finish, +48 places
over previous year

4/4

Dynamic Events scored, a

Your Return on Investment

Sponsoring TigerRacing isn't just a donation. You get access to a growing, engaged audience and direct access to highly capable engineering talent. Here's what your partnership puts to work.

Reach & Visibility

Your brand travels with the team.

Across our social platforms, TigerRacing reaches a community of **8,000+ followers** and generated **504k impressions over the past year**.

When your logo rides with us, it's seen by **an audience that's actively following the build**, season after season, at competition, on campus, and in every post our car appears in.

Talent & Recruiting

You're funding your next hires.

TigerRacing members span 10+ disciplines across **engineering, business operations, and creative direction**.

Every member has delivered production-ready work under conditions that mirror the real workplace: on deadline, on budget, and with something on the line.

Our partners get **first access** to that pipeline.

501(c)(3) Registered

TigerRacing is a registered 501(c)(3) non-profit organization. All monetary contributions and in-kind donations are **tax-deductible** at their fair market value, meaning your sponsorship works harder than a standard marketing spend.

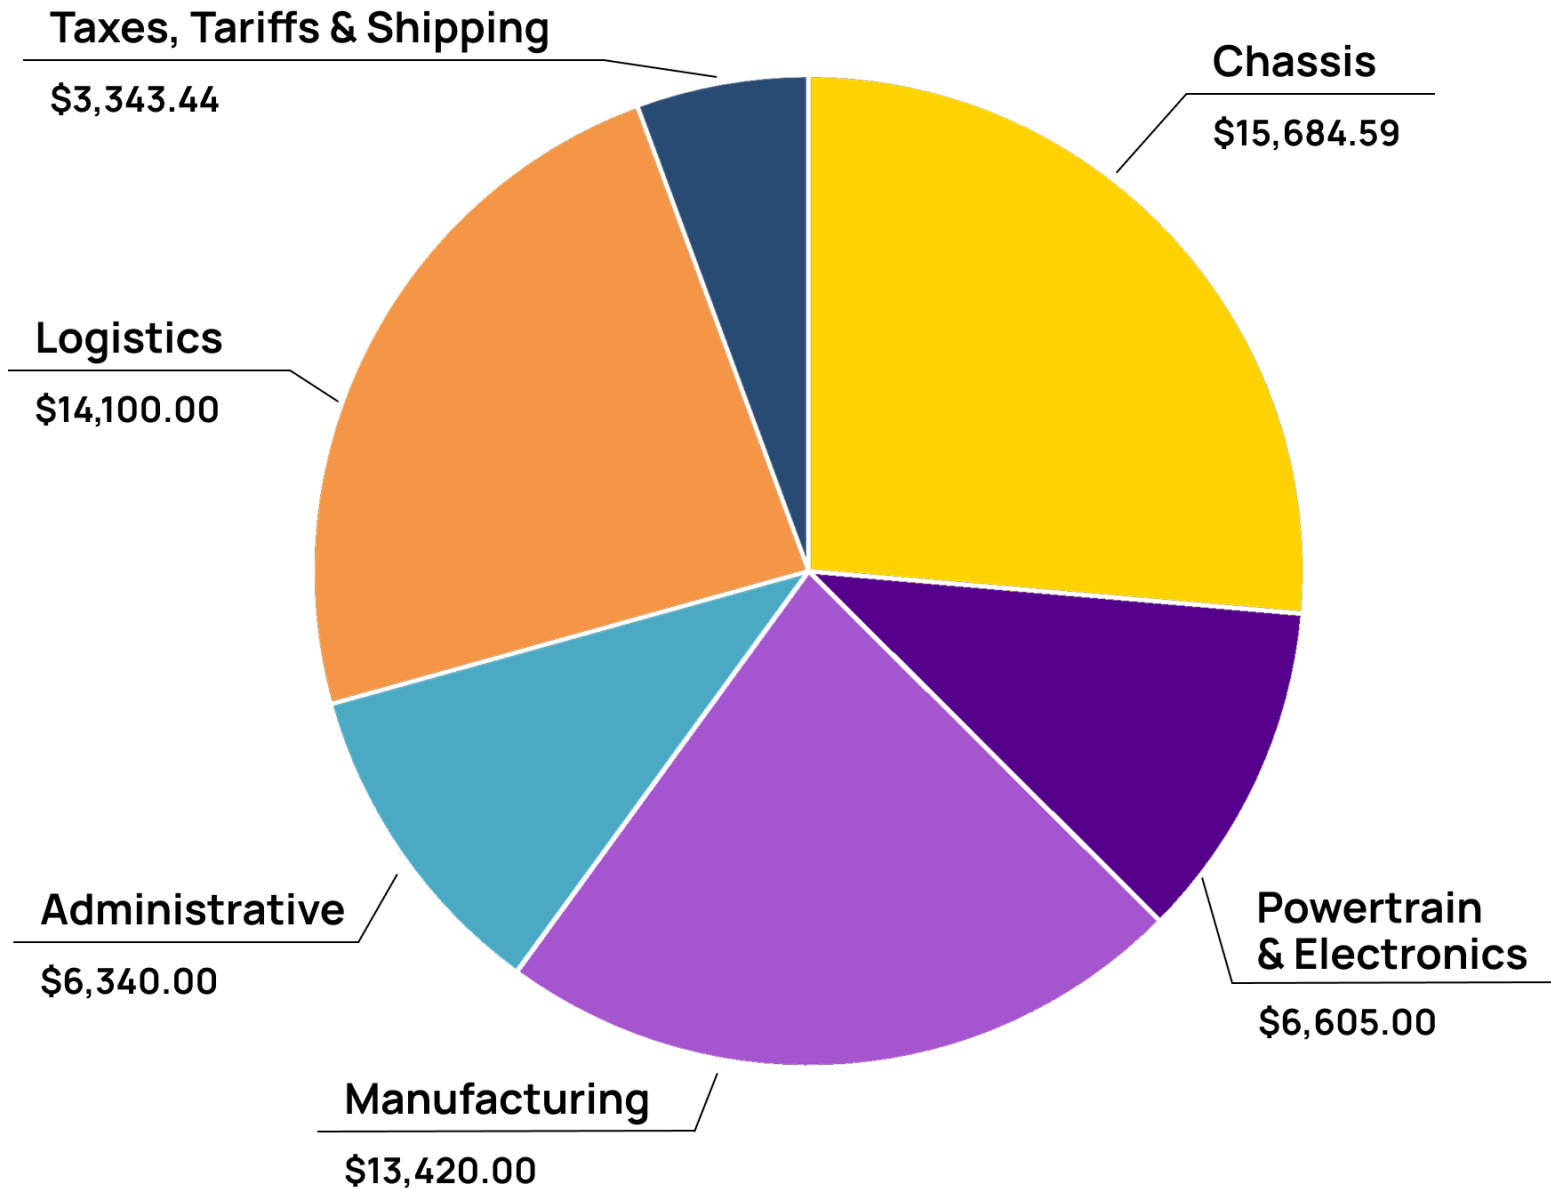

Community Outreach

TigerRacing is committed to fostering the next generation of innovators. We frequently **host shop tours** and hands-on demonstrations for **local K-12 students**, including Girl Scout troops and youth clubs. By opening our doors, we provide a tangible look at the exciting possibilities within STEM and show young students that they can build the future.

Our outreach efforts aim to spark a passion for complex engineering through direct engagement with our design and fabrication processes. By sharing our technical journey and the challenges of building a formula-style car, **we strive to build confidence in young learners**. These interactions allow us to share our resources and help cultivate the next generation of engineers and problem-solvers.

Sponsorship Packages

TigerRacing is a **registered 501(c)(3) non-profit organization**, making your contributions **tax-deductible**. We welcome both monetary sponsorships and **in-kind donations**, including CNC machining services, laser cutting, raw materials like carbon fiber, or software licensing. These contributions are valued at their fair market price and will be applied toward the corresponding sponsorship tier and its associated benefits.

	Bronze \$100 - \$999	Silver \$1000 - \$1999	Gold \$2000 - \$4999	Platinum \$5000+

Package Descriptions

Platinum Sponsor

\$5,000+

- 16" x 8" Logo on the car
- Logo appears on T-Shirt
- Attendance to In-person Networking Reception
- Everything in the tiers below

Gold Sponsor

\$2,000 - \$4,999

- 10" x 6" Logo on the car
- Resume Booklet
- Social Media Post
- Polo Shirts
- Everything in the tiers below

Silver Sponsor

\$1000 - \$1,999

- Framed Photo
- Logo on Website
- Drive Day Attendance
- 6" x 4" Logo on the car
- Everything in the tiers below

Bronze Sponsor

\$100 - \$999

- Machine Shop Tour
- T-Shirts
